

Centre of Modern Languages

IMPORTANT NOTES

If for one subject you can find several different types (lecture, practice, laboratory) of courses then please choose one and only one course from each type in order to be able to perform the subject's requirements successfully. Civil Engineering courses are on the website separately. Courses chosen from the offer of Faculty of Civil Engineering will be checked and arranged individually by the departmental coordinator.

| Subject code | Subject name | | | Requirement | ECTS credit |
|--|------------------------------------|-----------------|-----------------------|-------------------|-------------|
| BMEGT61A051 | German for Engineers - B2 | | | Mid-semester mark | 2 |
| Course type | Course code | Course language | Timetable information | | |
| Practice | k312_nm | German | WED:12:15-14:00 | | |
| <p>Subject name German for Engineers Subject code(s) BMEGT61A051 Lesson type, Lessons per week Seminar 2 lessons (90 minutes) once per week Type of Mark mid-semester mark Number of Credits awarded 2 credits Recommended Entrance Requirements Common European Framework of Reference for Languages level B2 (intermediate), or minimum 75 TOEFL IBT score or similar language knowledge It is recommended that students take a level test (available in different languages on the www.inyk.bme.hu website) to determine their language level and choose a suitable course. Programme aims By the end of the course the student will have the language skills and will use lexical resources at B2 level to allow him/her to carry out tasks in the target language in the course of his/her studies and work. Competences Oral comprehension/ Speaking skills: Students will be able to use understand and take notes on the main content points of complex texts related to their professional fields, and to contribute to professional discussions. They will be able to express and justify their opinions on technical topics. Written comprehension/Written composition: Students will be able to comprehend short texts of a technical nature in their entirety, and to extract the main points from longer texts, and to produce texts in the target language or their native language synthesising two or more sources of information. Topics covered Technical style Definitions and Categorizing The shapes of objects and the properties of materials Describing machines, instructions for use Spatial relations Describing processes Cause and effect Comparisons; describing and interpreting data in tables and graphs Changes, trends Problems, solutions Requirements for participation in the lessons "If a student is absent from more than 30% of the total number of lessons of seminars [...] then he/she cannot obtain the credits of the subject." Code of Studies and Exams, Article 14 (3) Subject requirements 1/3 – the student's performance during the semester 1/3 – mid-term test (based on the material taught during the course, max. 45 minutes) and an individual talk or a translation 1/3 – 90-minute end of term written test (reading comprehension and written composition)</p> | | | | | |

| <p>This interdisciplinary course covers a variety of interconnected fields to present a comprehensive survey of Hungarian culture and history. The course is thematically organised and focuses on Hungarian culture as it is expressed through the arts (fine arts, literature, music). Special emphasis is given to the history of Hungarian thought from early to recent times. The concepts of Hungarian poets, writers, composers, and scientists are considered in their historical and social context.</p> | | | | |
